Material Handling in Warehouses

Telemecanique Sensors is a world-class global brand offering a comprehensive line of products to support your material handling applications. Whether you are specifying a detection solution for an automated storage and retrieval system, or a conveyor system, Telemecanique Sensors has a sensor solution for you!
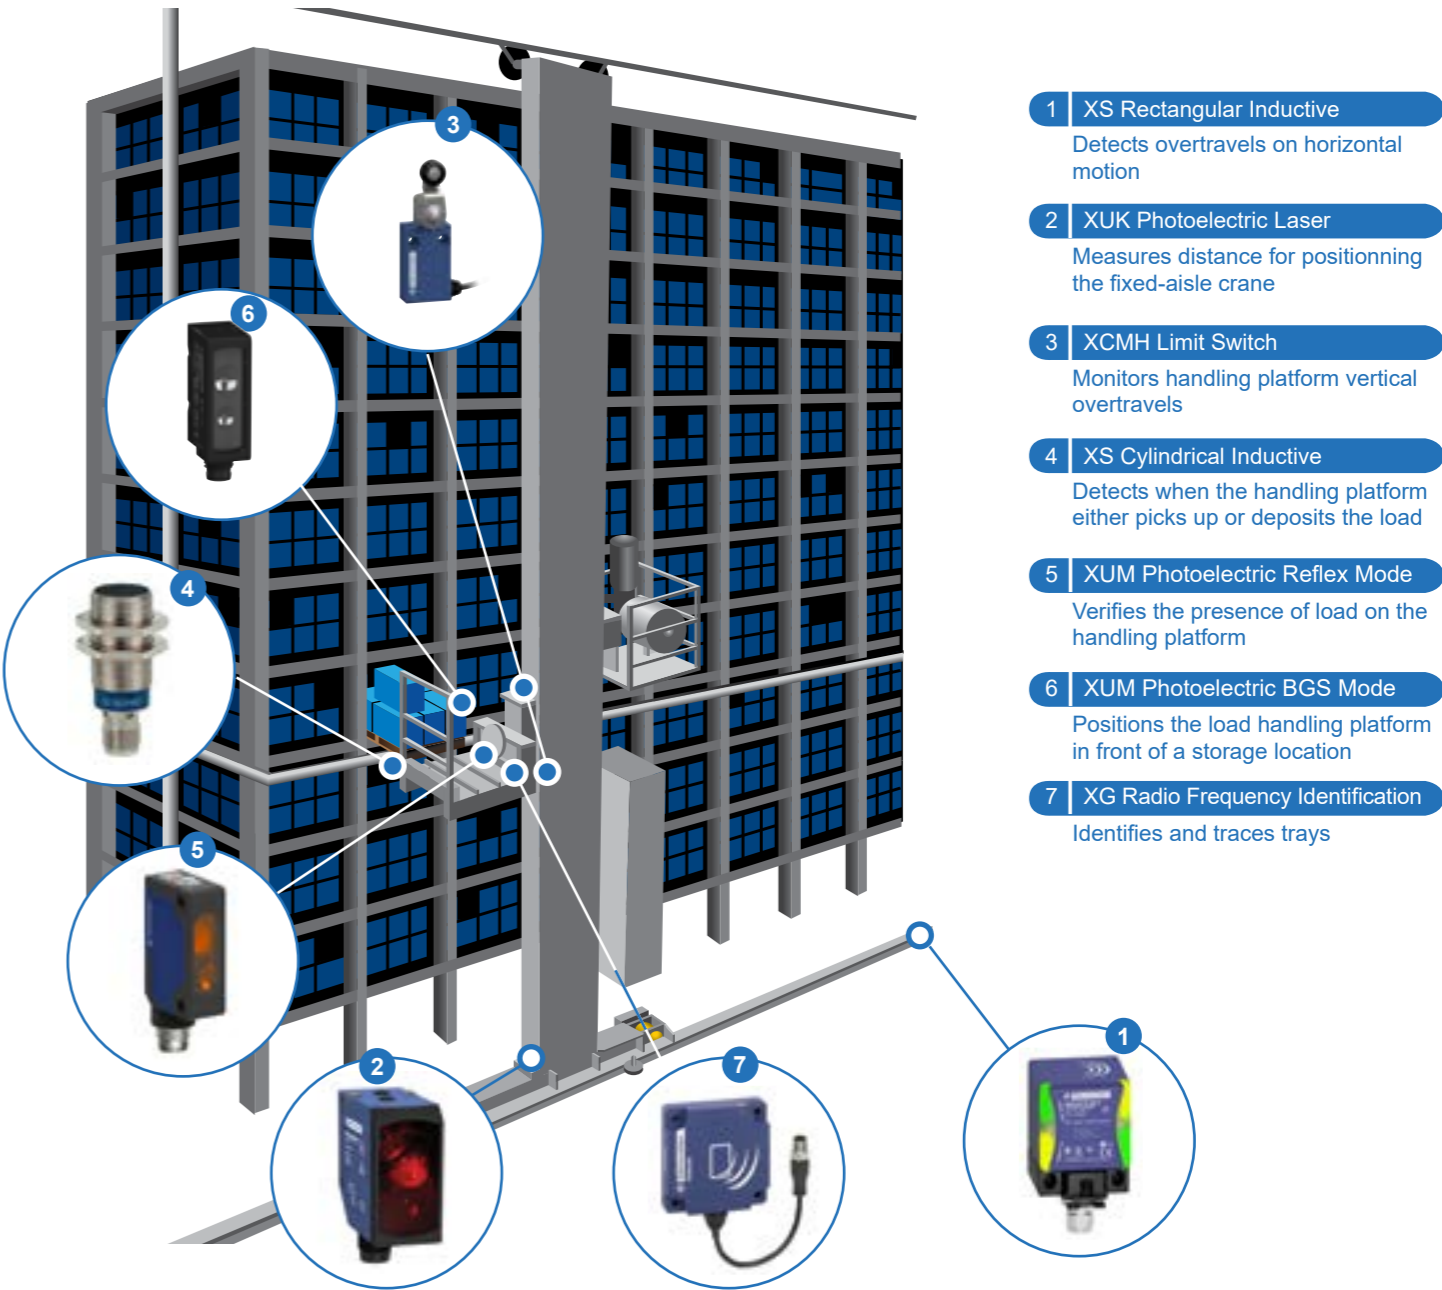

On the following pages, the sensors used to operate these three primary material handling machine systems are identified by the function they perform. Locate the sensor performing the specific task you are addressing and then find the specification details for that sensor in the product index section beginning on page 5.
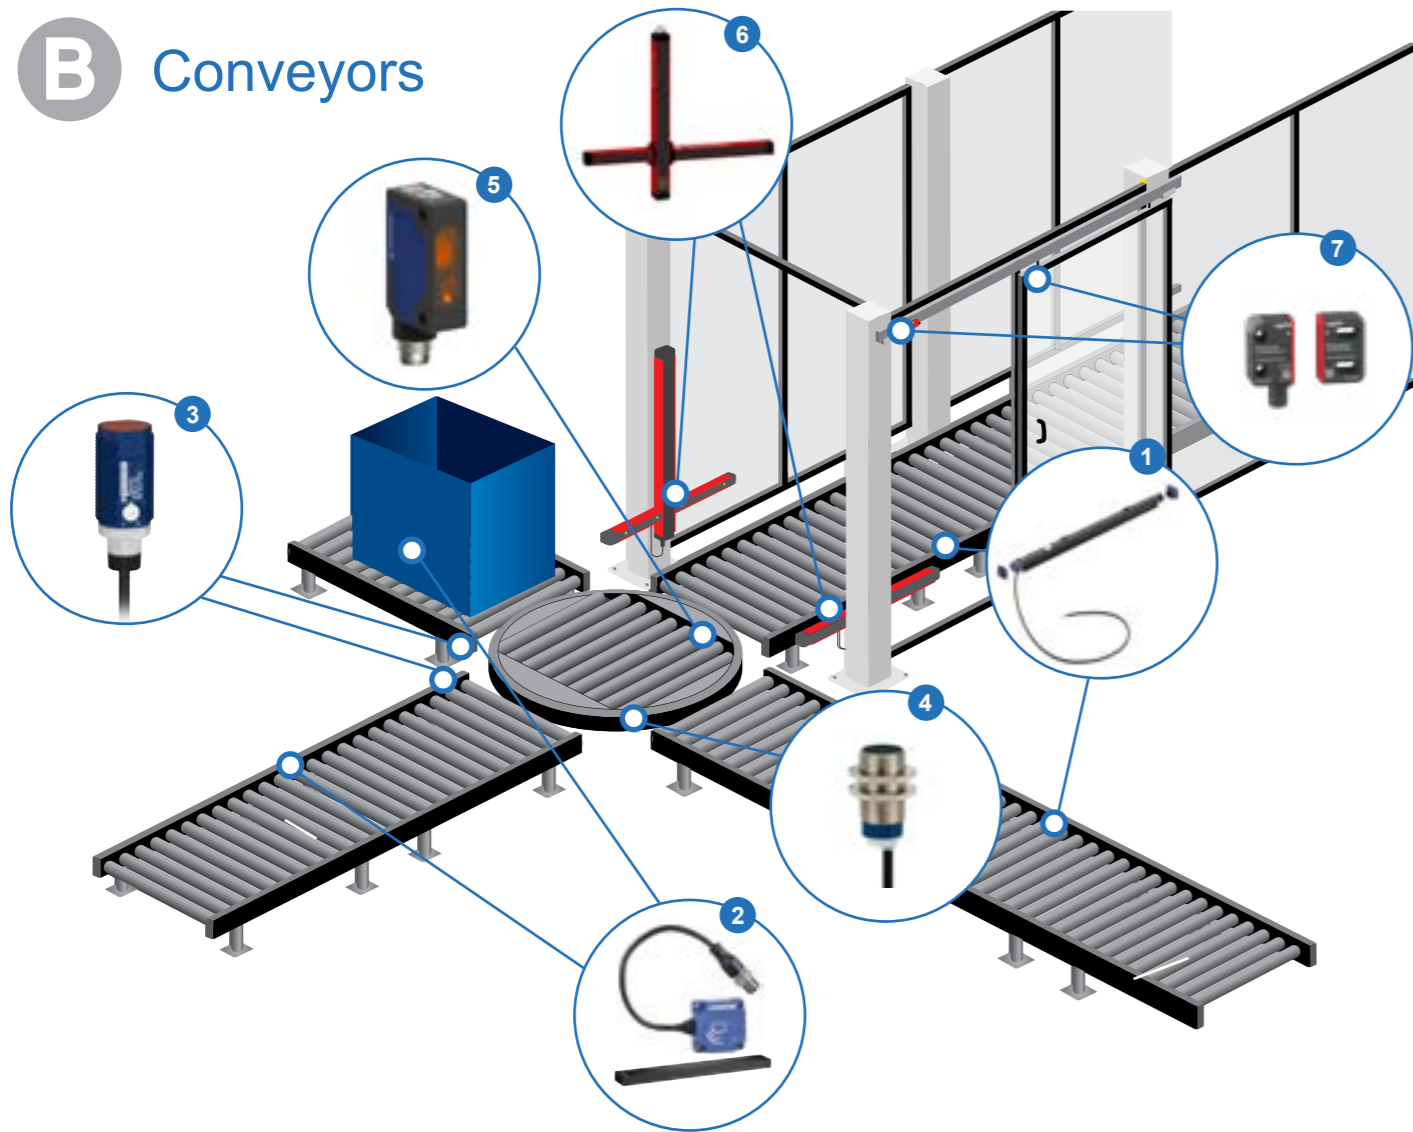

We make the process of choosing a sensor Simply easy!

A Automated Storage & Retrieval Systems
Example of a unit load Automated Storage & Retrieval System

1	XS Rectangular Inductive

Detects overtravels on horizontal motion

2	XUK Photoelectric Laser

Measures distance for positionning the fixed-aisle crane

3	XCMH Limit Switch

Monitors handling platform vertical overtravels

4	XS Cylindrical Inductive

Detects when the handling platform either picks up or deposits the load

5	XUM Photoelectric Reflex Mode

Verifies the presence of load on the handling platform

6	XUM Photoelectric BGS Mode

Positions the load handling platform in front of a storage location

7	XG Radio Frequency Identification

Identifies and traces trays

B Conveyors

1	XUY Roller Photoelectric Sensor	Integrated, between-the-rollers detection of the passage and presence of any object
2	XG Radio Frequency Identification	Traceability of packages in the warehouse
3	XUN Photoelectric Reflex Mode	Detecting the presence of packages for turntable position synchronization
4	XS Cylindrical Inductive	Positioning turntable for transferring products from conveyor to conveyor
5	XUM Photoelectric Reflex Mode	Acknowledging the product at the right position before rotating the turntable
6	XUSL4M Safety Light Curtains with Muting	Efficient detection of machine operators with uninterrupted automation processes
7	XCSRM RFID Safety Sensor	Shuts down the machine if the door opens

XUK Laser

Sensing Mode	Sensing Distance	Output	Catalog Part Number
			M12 Connector
Reflex polarized for distance measurement	70 m	4-20 mA + NO/NC	XUK9TAH2MM12
Background suppression for distance measurement	5 m	4-20 mA + NO/NC	XUK8TAE2MM12

XUY Roller

Sensor designed for roller conveyor from 200 to 1200 mm wide, using photoelectric infrared diffuse mode technology. The sensor detects package down to 55 mm wide.

Sensor design, output signals and accessories selection according to your conveyor configuration to be set up through our roller sensor configurator: https://roller-configurator.telemaniquesensors.com/

Expertise

Telemecanique Sensors is a world-class global brand offering a comprehensive line of over 25,000 types of sensors, including limit switches, pressure sensors, photoelectric sensors and proximity sensors. In addition, we provide state-of-the-art RFID systems compatible with most PLC manufacturers.

Telemecanique Sensors products follow international design standards IEC, EN, UL, GT/B. They are delivered with the relevant markings CE, UKCA,UL, cULus, CCC, ATEX. Environmental compliance declarations Reach, RoHS, POP, TSCA are available.

Telemecanique Sensors is focused on 3 core values - Simplicity, Expertise, and Proximity. Our focus on *Simplicity* is reflected in the ease with which our products can be specified, installed, and used. Our focus on *Expertise* is reflected in our 70+ years of securing all the necessary and applicable certifications and our long history of addressing some of the most demanding machine applications in the industry. Our focus on *Proximity* can be seen in the worldwide availability of our products and technical support.

In short, we make sensing technology simple. We have the experience to address the most challenging applications. And we are there to help.
